

## CONTENT

| <b>Title</b>  | <b>Author</b>   | <b>Page No.</b> |
|---|---|-----------------|
| Groups of Latin Square Designs in agricultural experiments with covariate   | Bikas K Sinha, Ganesh Dutta   | 1-5             |
| Estimating Rank Correlation in Sample Surveys   | Arijit Chaudhuri and Tathagata Dutta  | 6-17            |
| Evolution of initial mass function in Young Massive Star Clusters (YMCs)  | Abisa Sinha, Tanuka Chattopadhyay and Asis Kumar Chattopadhyay                | 18-25           |
| Some ageing properties of Dynamic Additive Mean Residual Life Model   | Suchismita Das and Asok K. Nanda  | 26-33           |
| Trend free design under two-way elimination of Heterogeneity  | Arpan Bhowmik, Seema Jaggi, Eldho Varghese and Sunil Kumar Yadav              | 33-38           |
| Statistical Inference based on the Logarithmic power divergence   | Avijit Maji, Saptarshi Chakraborty and Ayanendranath Basu                     | 39-51           |
| 2 <sup>n</sup> - Factorial Set Up – Some Aspects  | Premadhis Das   | 52-57           |
| Challenges in the Covariance Estimation of Longitudinal data : a review   | Kiranmoy Das  | 58-66           |
| A Statistical Perspective of Inverse and Inverse Regression Problems  | Debashis Chatterjee and Sourabh Bhattacharya                                  | 67-82           |
| State-wise comparative analysis of different cost components and factor productivity of paddy in India during last decade | S. Chatterjee   | 83-97           |
| Composite index for cash crop production  | Anurup Majumder, Manoj Kumar, Dikeshwar Nishad, Hiranmoy Das and Adyant Kumar | 98-100          |
